Connecting to Care

ASSISTIVE TECHNOLOGY

Assistive Technology is:

A term used to describe any device, technology, tool or product, from the simplest to the most complex that can make a particular function easier or possible to perform.

From low tech to high tech devices, the latest cutting edge technology is changing the way people are communicating and accessing their environment, regardless of ability.

Connecting to Care Offers:

- An AT Team with qualified specialists provide individual and group hands-on training in our AT Assessment Center for families, care givers, teachers, employers and community professionals who provide services to individuals with disabilities.
- On-site assessments of technology needs, including evaluations at home, work, and school.
- Assistance with the acquisition of equipment.
- Selecting, customizing, and set up of assistive devices.
- Coordinating with existing education, employment and rehabilitation plans and programs.

IMAGINE

A young child with limited mobility using Assistive Technology to control and play with a battery-adapted toy;

An adult with autism telling a joke or expressing emotion using a speech-generating device;

A senior using screen magnification software while accessing the internet;

A computer reading a history class assignment to a student who is blind;

A mother with limited speech reading a bedtime story to her child.

WE CAN HELP YOU FIND WHAT YOU NEED

Connecting to Care strives to match individuals to practical technologies that help them access their, education, employment and community.

For Example:

- Magnifiers
- Mechanical Grabbers
- Voice Recognition Software
- Customized Tablets and Computers
- Eye-Gaze Systems
- Home Automation

CtoC Provides a "One Stop Shop" offering comprehensive TeleHealth services emphasizing the value of collaboration and the benefit of integrated services to those we serve.

There is no one better qualified than you to envision the fullest potential of your child, student, client or yourself.

At Connecting to Care we help people of all abilities and ages find the technology that will allow them to fulfill their greatest potential.

MAKING A DIFFERENCE

Our data clearly indicates that when we provide an integrated approach we are optimizing outcomes, strengthening the individual as a whole person:

- Psychiatry for medication stabilization
- Behavioral Services for mental health
- Assistive Technology

Increasing communication skills has resulted in 100% of our AT patients successfully reducing their psychotropic medications.
